## TECHNICAL SERVICE BULLETIN 10017

MODEL(S): 19 DX III

**DESCRIPTION:** Excessive feedback when using PA.

**ACTION:** There is too much microphone gain for the PA function, which makes the radio

excessively prone to acoustic feedback.

To correct, install a 10K ohm resistor from the open contact on the PA switch to

the collector of Q12. Put an insulating sleeve over the resistor.

Refer to the pictures on pages 2 and 3.

**ADJUSTMENTS:** None.

**NOTES:** None.
