

DX 94HP

STARRING:

- * 100 watt maximum power output from four IRF520 MOSFETs - (60 watts more than the DX 99V)
- * Maximum current is 25 amps
- * Heavy-duty DC power cord (same as the DX 95T2)
- * Low profile bottom heatsink (same as the DX 95T2)
- * Blue LEDs for frequency and channel readouts
- * Dual blue LEDs light our signature large meter

ALSO FEATURING:

- StarLite faceplate (all printing is backlit)
- Meter scales indicating power output, SWR and incoming signal strength
- Side mic jack - not a front mic jack
- AM/USB/LSB modes, but no FM

INCLUDED STANDARDS:

- ★ Variable power output control
- ★ Variable receive gain control
- ★ Variable dimmer control for LEDs, meter lamp and faceplate lettering
 - ★ Switch to turn off the frequency digits
- ★ Variable Talkback circuit with on/off switch
- ★ Echo and Voice Changer like the old DX99V, but no Robot
- ★ Echo/Voice Changer controls on the front panel, not inside the radio
 - ★ Roger Beep with on/off switch
 - ★ Automatic SWR circuit
- ★ Standard clarifier circuit - no on/off switch
- ★ Same main PC board as our DX95T2
- ★ TWO YEAR GALAXY WARRANTY
